

Exp 4: Data Modelling and Form Design for a Business Application in Zoho Creator (Vehicle Service Request Form)

Name: Revathy K | Register No: 241401080 | Department: CSBS

1. Aim

To design and build a functional “Vehicle Service Request Form” application in Zoho Creator that demonstrates the correct usage of all thirteen Basic Fields available in the Form Builder, while solving a real automobile service centre requirement of scheduling and pre-recording vehicle repair and maintenance requests.

2. Procedure

2.1 Problem Statement & Application Scope

A multi-brand vehicle service centre currently accepts repair requests over the phone or through walk-ins, which leads to overlapping pickup schedules, no advance record of the reported issue, and no way for the workshop to arrange the required technicians and spare parts before the vehicle arrives. Vehicle owners frequently experience delayed servicing because there is no prior scheduling or triage system.

Design a low-code application using Zoho Creator that allows a vehicle owner to submit a service request through a single online form. The form must capture owner identity, contact details, pickup address, vehicle details and service time preference, issue details, and authorization for repair — using every Basic Field type provided by Zoho Creator's Form Builder.

2.2 Data Model & ER Diagram

A Data Model consists of both the visual Entity–Relationship (ER) diagram showing schema relationships and the structured Data Dictionary table defining field types and constraints. The diagram below represents the schema generated for Vehicle_Service_Request_Form, showing the primary form entity, composite data structures, and the choice/lookup entities, connected through explicit relationships with cardinality (1:1, 1:N, M:N).

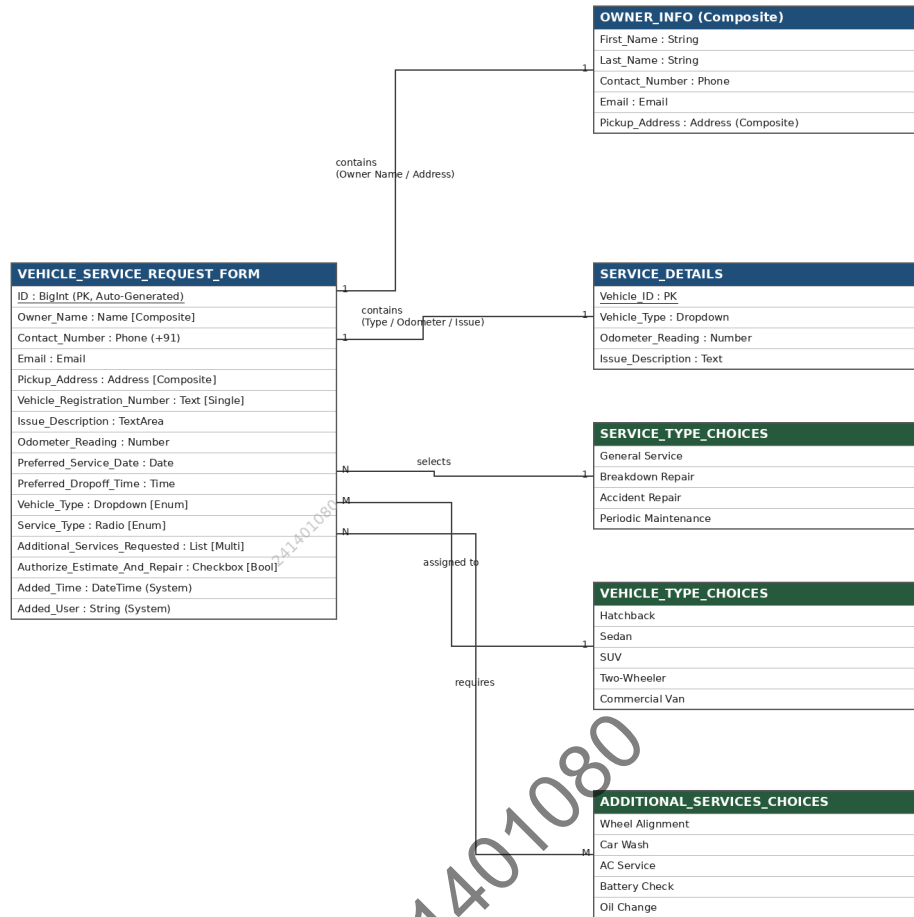

Figure 1: Entity-Relationship (ER) Schema Diagram for Vehicle Service Request Form

2.3 Basic Fields Mapping & Data Dictionary

Table 1 presents the mapping of all thirteen Basic Fields from the Zoho Creator Form Builder palette to their specific roles, purpose, and general sample values.

Basic Field	Form Field Name	Field Link Name	Purpose & Validation Constraints	Sample Value
Name	Owner Name	Owner_Name	Captures the full name of the vehicle owner using First / Last subfields (Mandatory).	Ram K
Phone	Contact Number	Contact_Number	Captures a validated mobile number with country code, used to confirm pickup and service updates.	+91 81234 56789
Email	Email	Email	Captures a validated email address for sending service confirmation and estimate details.	ram@gmail.com
Address	Pickup Address	Pickup_Address	Captures the address from which the vehicle is to be picked up (Address Line	No 1, Eswar Nagar, Kodambakkam,

Basic Field	Form Field Name	Field Link Name	Purpose & Validation Constraints	Sample Value
			1, City / District, State / Province).	Chennai, Tamil Nadu
Single Line	Vehicle Registration Number	Vehicle_Registratio n_Number	Captures a short free-text unique vehicle registration number (Mandatory).	TN 34 AB 5678
Multi Line	Issue Description	Issue_Description	Captures a free-text description of the problem reported by the vehicle owner.	Unusual grinding noise from the front brakes and reduced mileage over the last week.
Number	Odometer Reading	Odometer_Reading	Captures the numeric odometer reading in kilometres (Mandatory, must be positive).	45230
Date	Preferred Service Date	Preferred_Service_ Date	Captures the date on which the owner prefers the vehicle to be serviced.	20-Aug-2026
Time	Preferred Dropoff Time	Preferred_Dropoff_ Time	Captures the owner's preferred vehicle drop-off time slot (HH:mm:ss, Mandatory).	09:30:00
Drop Down	Vehicle Type	Vehicle_Type	Presents a single-select list of vehicle categories available for service.	Sedan
Radio	Service Type	Service_Type	Captures a single mandatory selection among General Service / Breakdown Repair / Accident Repair / Periodic Maintenance.	Breakdown Repair
Multi Select	Additional Services Requested	Additional_Servic es_Requested	Allows selection of one or more additional services required alongside the main repair.	Wheel Alignment, Car Wash
Checkbox	Authorize Estimate And Repair	Authorize_Estimate _And_Repair	Captures the owner's consent authorizing the estimate and the repair work (Mandatory).	Checked (Agreed)

Table 1: Mapping and Specification of Thirteen Basic Fields in Vehicle_Service_Request_Form

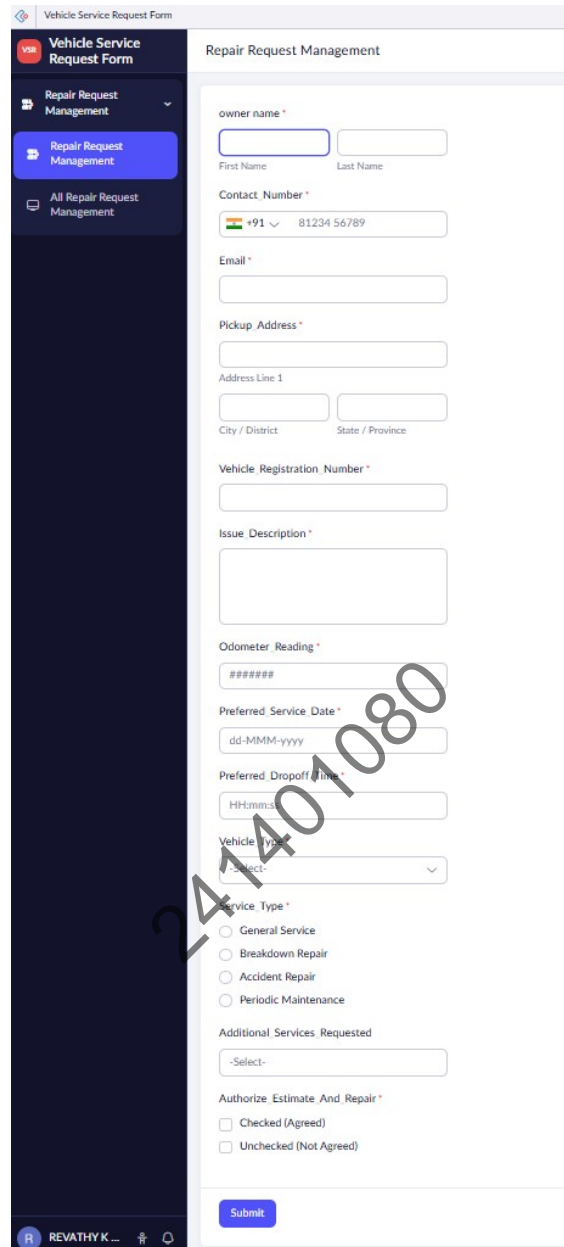

2.4 Form Layout & Configuration Steps

The Vehicle_Service_Request_Form was organized into four logical, owner-friendly sections:

- **Section A — Owner Identification:** Owner Name (Name), Contact Number (Phone), Email (Email).
- **Section B — Pickup Details:** Pickup Address (Address), Vehicle Registration Number (Single Line).
- **Section C — Service Scheduling:** Preferred Service Date (Date), Preferred Dropoff Time (Time), Vehicle Type (Drop Down), Odometer Reading (Number).
- **Section D — Issue & Authorization:** Issue Description (Multi Line), Service Type (Radio), Additional Services Requested (Multi Select), Authorize Estimate And Repair (Checkbox).

3. Output

The following figures show the live preview of the form and the submitted repair records in the report view:

The image displays a mobile application interface for a 'Vehicle Service Request Form'. The interface is divided into a dark blue sidebar on the left and a white main content area on the right. The sidebar contains the application logo 'VSR Vehicle Service Request Form' and a menu with two items: 'Repair Request Management' (selected) and 'All Repair Request Management'. The main content area is titled 'Repair Request Management' and contains a form with the following fields: 'owner name' (split into 'First Name' and 'Last Name'), 'Contact Number' (with a dropdown for country code, currently showing '+91'), 'Email', 'Pickup Address' (split into 'Address Line 1' and 'City / District' and 'State / Province'), 'Vehicle Registration Number', 'Issue Description', 'Odometer Reading' (with a placeholder '#####'), 'Preferred Service Date' (format 'dd-MMM-yyyy'), 'Preferred Dropoff Time' (format 'HH:mm:ss'), 'Vehicle Type' (a dropdown menu), 'Service Type' (radio buttons for 'General Service', 'Breakdown Repair', 'Accident Repair', and 'Periodic Maintenance'), 'Additional Services Requested' (a dropdown menu), and 'Authorize Estimate And Repair' (checkboxes for 'Checked (Agreed)' and 'Unchecked (Not Agreed)'). A 'Submit' button is located at the bottom right of the form. A large, semi-transparent watermark '241401080' is overlaid diagonally across the center of the form.

Figure 2: Live Application Runtime Preview for Vehicle_Service_Request_Form Entry

owner name	Email	Pickup_Address	Contact_Number	Vehicle_Registration_Number	Issue_Description	Odometer_Reading
ram k	ram@gmail.com	no 1, eswar nagar, kodambakkam, chennai, tamil nadu	+911234567896	TN 34 AB 5678	Unusual grinding, noise from the front brakes and reduced mileage over the last week.	45230

4. Result

The “Vehicle Service Request Form” application was successfully built in Zoho Creator using all thirteen Basic Fields, with full field validations, section layout formatting, ER schema modeling, and report view generation meeting all assignment requirements.
